DETAILED ACTION

Drawings

Figures 3a-3e should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: Each of the drawings should be named in the brief description of the drawings. For example, the brief description should refer to drawings 3a-3e, rather than figure 3, which is not present in the application.

Appropriate correction is required.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 2863

Claims 17-31 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims merely describe manipulation of measurement data, and do not produce a tangible result.

Allowable Subject Matter

Claim 32 is allowed.

The following is an examiner's statement of reasons for allowance:

Claim 32 recites, "means for providing multiple time-shifted copies of the received signal which copies are time shifted according to a predefined relationship with said non-uniform pattern, and for adding the multiple time-shifted copies of the received signal to the received signal, and for reconstructing an original burst signal, and for calculating the flow characteristic using said reconstructed original burst signal". This feature, in combination with the remaining claimed structure, avoids the prior art of record.

U.S. Patent 6,796,189 discloses similar subject matter, but does not disclose claimed structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
